Hi Hope,

In scoping out the ask to BEAD, the team needed to confirm a couple of things with the larger EFED PCA/PCT team last week, but we should be sending something to you today.

Thanks,  
Amy

Hi,

We are compiling that information now and are targeting getting it to BEAD in the next few days (there are a couple of questions we want to ask others on the EFED PCT/PCA team to make sure we are approaching it correctly).

Thanks,  
Amy

Good afternoon Amy/Marion-

BEAD met internally after the meeting earlier today to begin scoping the ask from BEAD. **Ex. 5 Deliberative Process (DP)**

**Ex. 5 Deliberative Process (DP)**

During the group meeting earlier, EFED stated they would send BEAD the states and uses they are asking for additional data on. BEAD requests this confirmation before the full scoping on this timeline can be completed- can EFED confirm timing on delivery of this information?

In addition, once that is received, BEAD would request that RD go through the labels to confirm the following:

**Ex. 5 Deliberative Process (DP)**

RD- could this be done quickly in a few days after receiving the EFED information? BEAD also requests confirmation on the scope in writing from RD. **Ex. 5 Deliberative Process (DP)**

**Ex. 5 Deliberative Process (DP)**

Knowing the process that occurred for chlorpyrifos, BEAD doesn't expect to be able to get this information to EFED much before the current PRIA due date (December 14, 2020) which would leave little time for EFED and HED to complete that work. In addition, it may only be in draft form when initially delivered, and would take additional time to finalize in memorandum form.

BEAD suggests another follow-up team meeting be scheduled for next week to continue this conversation, perhaps with HED included, and to discuss the current assessment's refinements.

Thanks for your consideration/feedback,  
Hope
